PROJECTS

Cryptocurrency Price Tracker and Investment Simulation

📅 October 2021

- Built a full-stack web app to allow users to simulate and visualize the investment of cryptocurrency market
- Utilized React.js to allow users to dynamically visualize price movements over time periods of their choosing
- Incorporated API calls to Gecko API and stored data efficiently in MongoDB
- Deployed the web app using Heroku

Book Search Engine

📅 May 2021

- Developed a web app to search for books online utilizing GraphQLAPI built with the Apollo server
- Incorporated API calls utilizing the MERN stack with a Reach front end, MongoDB database, and Node.js/Express.js server

Weather Dashboard

📅 December 2020

- Designed a web app for users to retrieve weather data from multiple cities
- Formulated the application by retrieving data from the Open Weather API and its context.

SKILLS

- Languages: C++, Java, JavaScript, Python
- Browser Based Technologies: HTML, CSS, JavaScript, React.js, Bootstrap
- API Design: Client-Server Model, JSON, API, AJAX, REST
- Databases: MySQL, MongoDB
- Deployment and Delivery: Heroku, Git, GitHub, Unit Testing
- Server Side Development: Node.js, Express.js, User Authentication, MERN Stack

CAREER OBJECTIVE

Recent graduate with in Computer Science with certificate of Full stack Program from UCI Coding Boot Camp. Looking to leverage experience building responsive and scalable web and leading both front-end and back-end development.

EDUCATION

The Coding Boot Camp

Full Stack Flex Program
